Subject: The Jacobson Flare App

David,

Sorry for the delay in replying to you but I have been super busy lately. I took the time over the week end to have a good look at your app and I was completely blown away by the very professional way in which you have approached it and the excellent content. I have heard people mention the flare often over the years and I must admit I have never really taken the time to have a good look at it. You have certainly put a great deal of effort into the project and I'm sure it will be of immense benefit to pilots of all experience levels. The points you have made are valid and the industry is well overdue for such a breath of fresh air! I really enjoyed working through the app and I also took the time to take my Pacer for a few circuits to try it out. I must admit I was impressed at just how seamlessly it fits into the approach and landing. The little Pacer can be a bit of a challenge when it comes to landing as it has become known as a tailwheel with attitude. However, your techniques fit comfortable into planning of the approach and landing. Thank you very much for the opportunity to appreciate and apply your excellent technique.

All the best with you venture,

Cheers

Bob
